Website goal

My website will be centered on voice recording services, where my clients will be able to know the dates and times of booking, as well as a group of packages divided by time and service so that each client can choose the package that suits him, the site is designed with the goal of organizing and benefiting clients with voice recording services. Not only that, but as a sound recording company, we strive to keep up with the development process as much as possible.

Who is the website for?

The site is intended for individuals and businesses interested in any productive audio matters. To make this clear, we will design a site that can serve any company seeking to record an advertisement voice over, for example, or even seeking to market only itself. We also offer our services to anyone who wants to record a song, a lyric poem, or any other type of audio service. This site is designed for anyone who wants to benefit from our distinguished voice services, as we will provide him with all the information, prices, and reservation times. We will strive to serve our customers as much as possible through this site to ensure that they will receive an excellent service.

What do customers/ users expect to find or do there?

Everyone should expect the best service from the website, we are working through this website to provide the best and easiest experience that any customer can get, through the features provided by the site and the speed of organization and work in terms of booking dates, prices, and audio production, in addition to the multiplicity of Packages as needed, not only

these details that the customer will find in our site, but we will also provide him with all the information and people that he needs. We will ensure that each customer has an exceptional experience, and each customer should expect to have a clear experience in terms of dealing and the final product.

Is this website’s primary aim to inform, to sell (ecommerce, anyone?), or to provide a service?

The website's purpose is to offer information and services, information in the form of scheduling reservations and organizing available times, and services in the form of offering various voice services packaged according to costs and services provided.

To sum things up, we as a recording company will have our ultimate goal from the website to provide information and services to our customers in the simplest way, and not only that we are working to ensure that every customer gets the best experience and service through our website, but the goal of The website in addition to serves our customers, is to expands and increases our company's sales through online services.

Scope

Give a description of the scenarios and areas that the website will cover.

The site will cover the needs of customers, as each customer will be able to book an appointment of his own, and often this appointment will be with details of what we will offer him as a company and he is our customer, the site will also cover some details about prices and contents for each cooperation package between the company and the customer and not Only that, but we are striving to develop a site where the customer can send and receive his own audio files through our site, and I mean that without resorting to only other sites.

what the finished website will be used for?

As I mentioned earlier, the main purpose of the site is to provide the opportunity for all the company's customers to obtain the company's services online and practically. The site will answer all the inquiries that customers have, in terms of booking times and dates, and we will provide them with the available packages as each package has it own Features in terms of service and content. The website will be used to inform our customers with all the information that they may need, and also to sell them our services through our website, which will also increase our sales and market, because we will be selling them those services online.

Requirements

The requirement are so important to be recognized for every website to be made, as we are going to make an online record label website, we have to take multiple things into consideration, which are: The customers, the company and the deal between them.

Guests: guests are the normal visitor that will be able to browse our products and services but without buying them, they will also be able to read more about our company protocol and way of work, they can also have an access to “about” section, which is the section that we talk more about our company and achievements.

Customer account: every new customer must have an account before he purchases any service from our website, in account making process, he should include his name and his email address, he also must verify his email, then he will be able to choose a password to his account. If he were already having an account, we will able him to login into his account from the same page.

After the customer have an account or already logged in his account, he will be able to go to cart section where he can add a way to check out his product.

Cart section: in this section the user is required to add an payment method to check out his services, after he chooses his way of payment and information he will be able to check out his product.\

Rate section: Where you can rate the service after you try it, this section put us in a great situation because we will start to test our new online website services.

Note: Ratings section, is an extra section that I am going to work on after I finish the first three requirements.

Launching

purchased website domain name: naderdweik.80proof

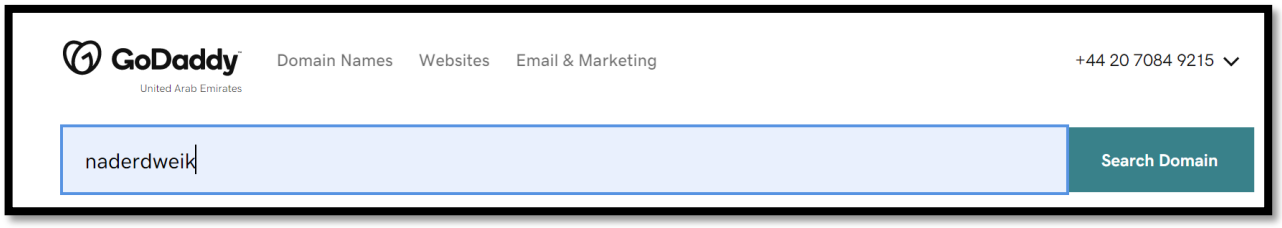
the host used to publish your website: Freehosting.com

The process that I had followed to publish my website:

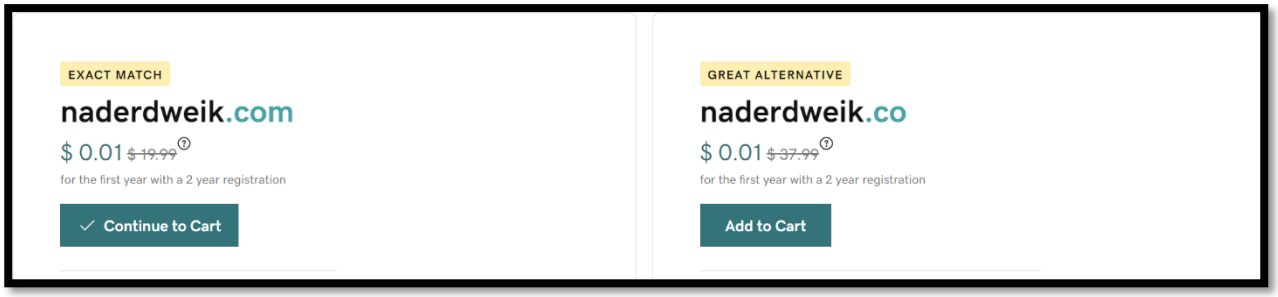
First thing you must do is to buy a domain from a trusted domain publisher, there is too many famous websites that offer you domains, such as: GoDaddy.com, porkbun.com, domain. Google.

To buy a domain:

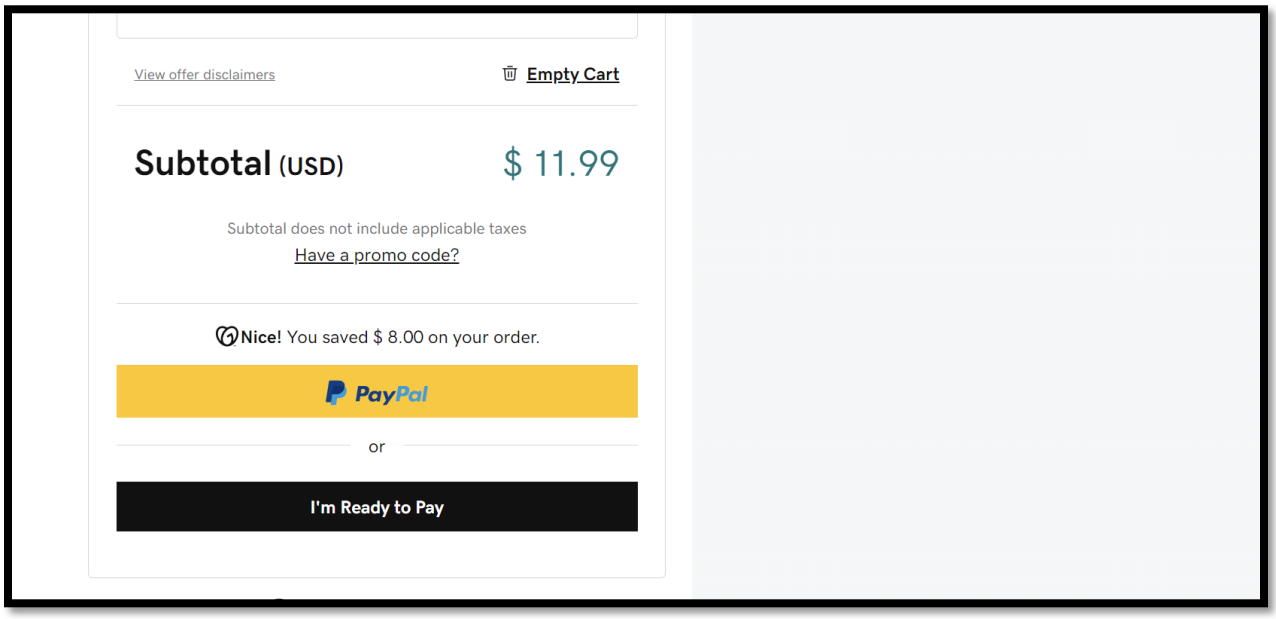
Step -1 go to GoDaddy.com and type a domain name that you would like to buy.



Step -2 choose your domain:



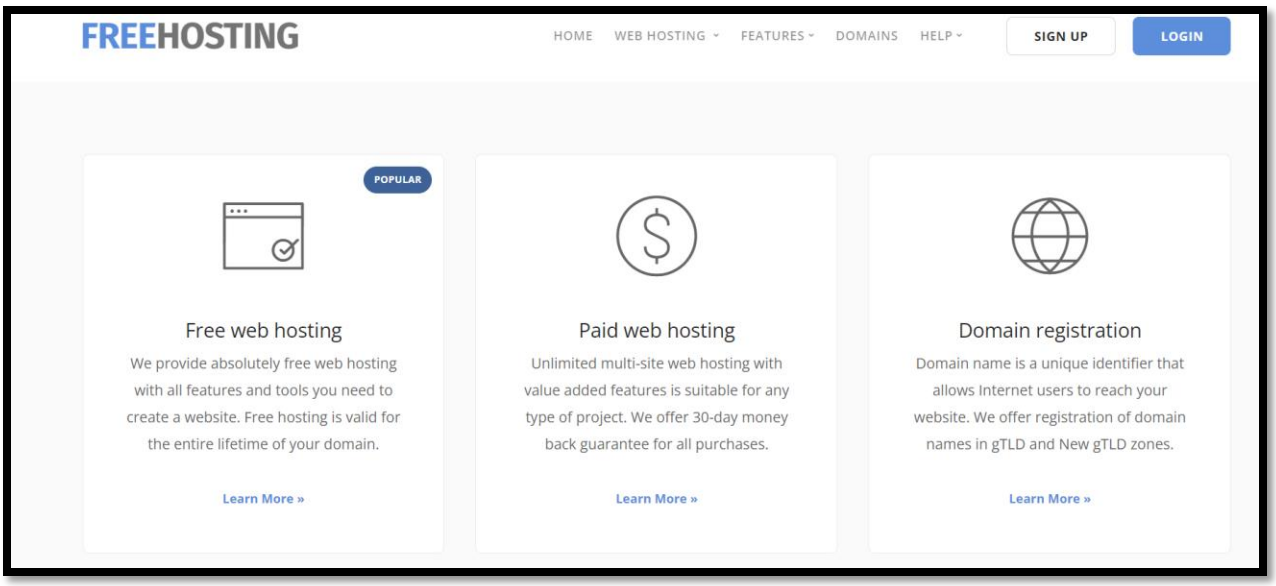
Step -3 proceed to check out



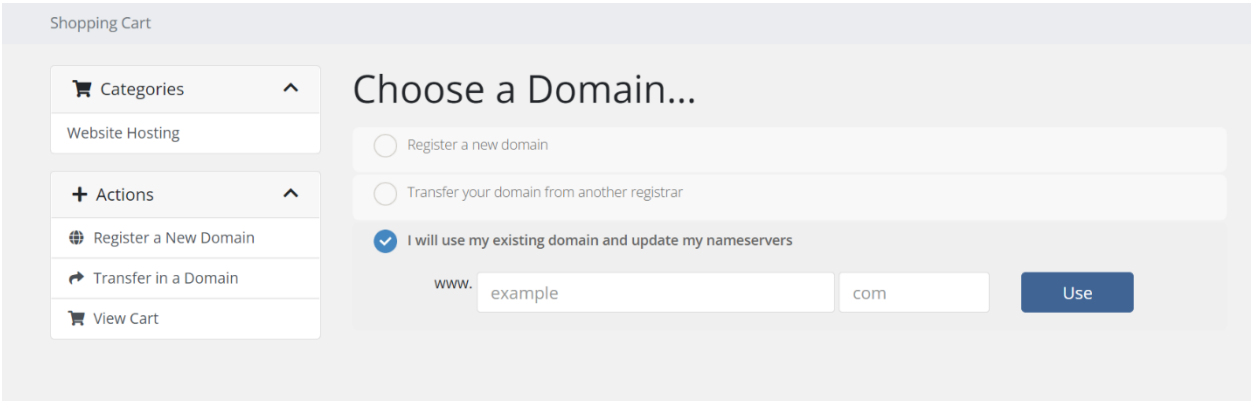
Host your Domain:

There is more than one choice you could go for a paid web hosting or for a free one, in my case I am going for a free one, and here are the steps for it.

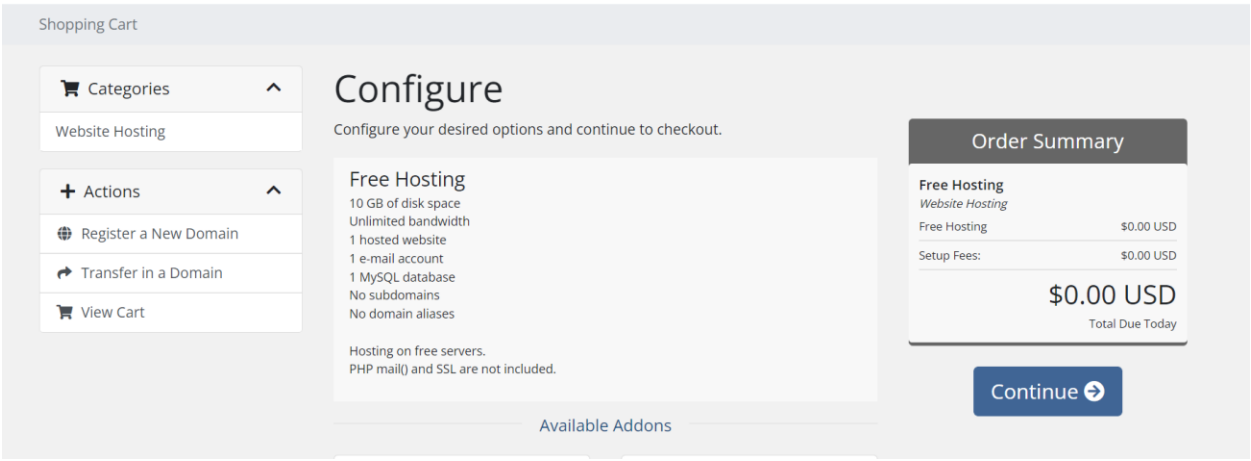
Step -1 Go for freehosting.com, choose free web hosting

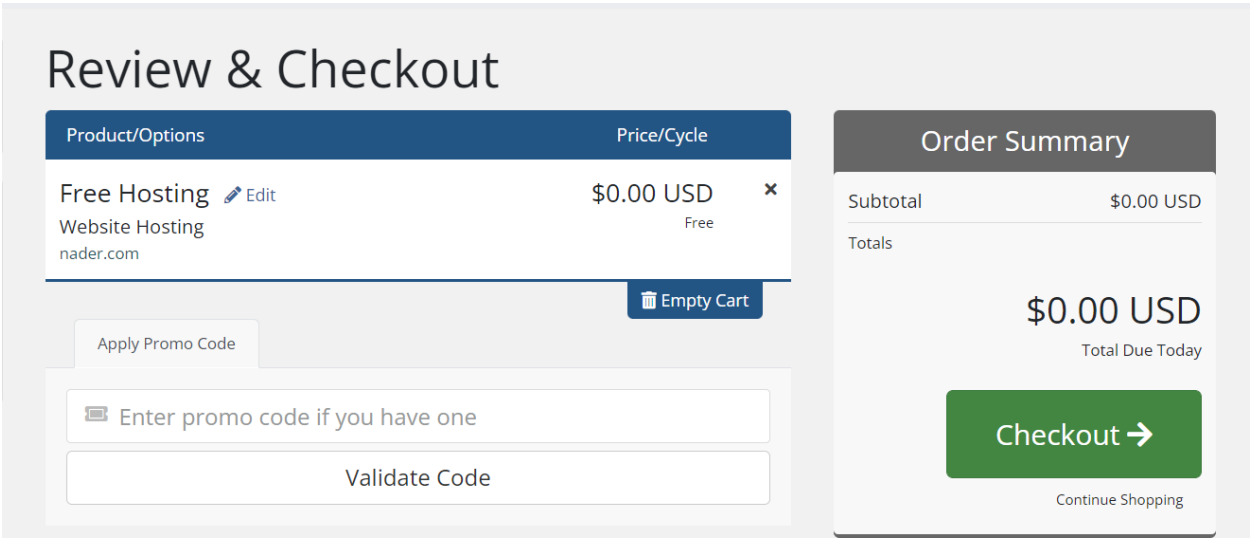


Step -2 choose the third choice, “using existing domain”

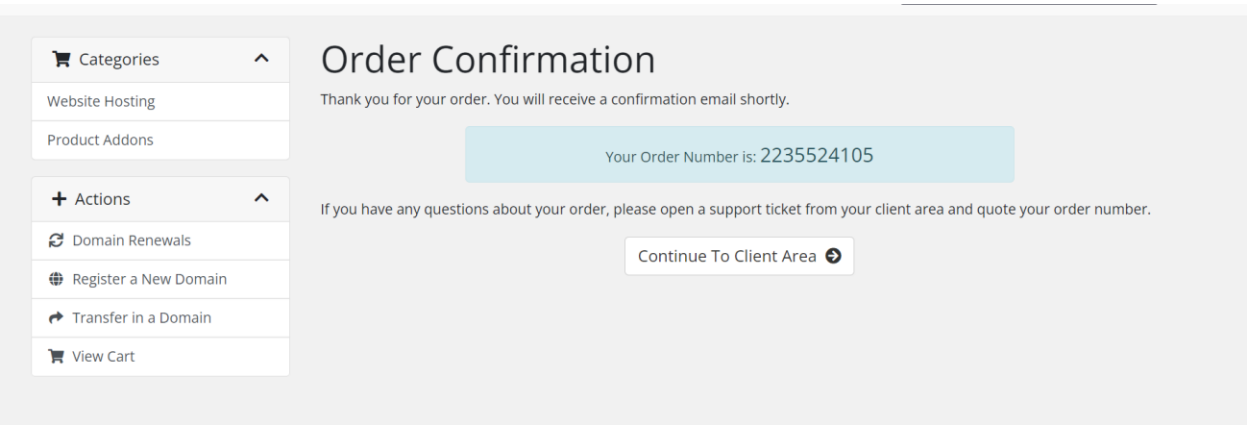


Step -3 procced to check out

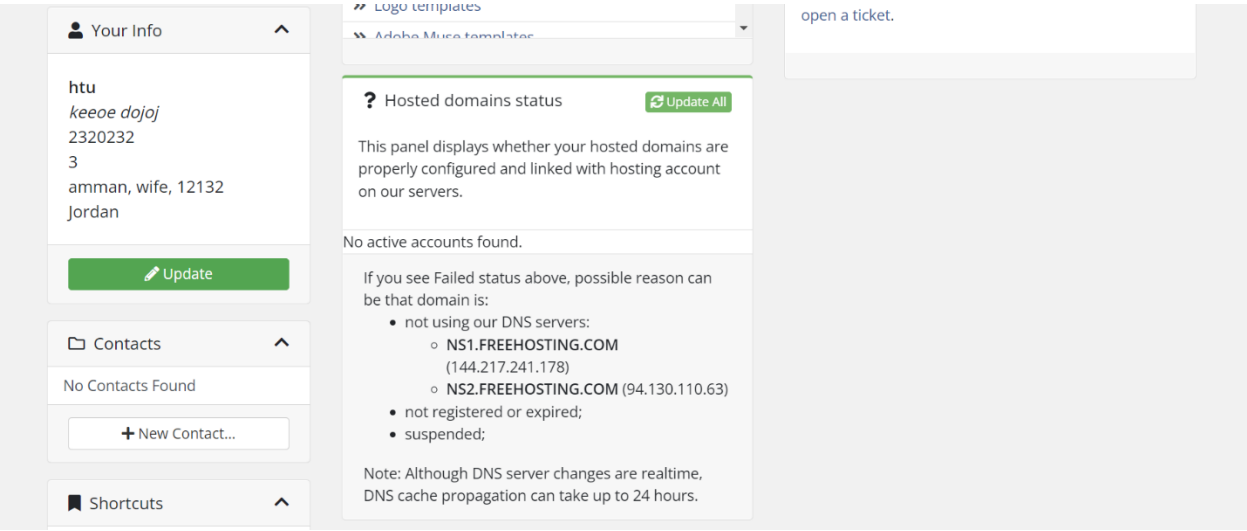




Step -4 order confirmation



Step -5 get our hosting number



Step -6 put your hosting number in the website that you have used to manage your domain with
